BALANCING YOUR SPINAL HEALTH

Balance your posture. Support your back. Your spinal health is one of the most important regions one often takes for granted. Incorrect posture, uncomfortable seating arrangements and long working hours can cause strain on your back. When that happens, fatigue sets in. Your concentration shuts down. And back pains and aches will cause discomfort. Now, it is time to Zoom in on the problem. During a standing position, the lumbar vertebrae column resumes its natural curvature. When changing

posture from standing to sitting, the pelvis tends to rotate backwards causing the lumbar spine to tilt into an uncomfortable humpback posture. A 90° sitting position with proper spinal support results in a perfectly balanced posture. The natural curvature of the lumbar vertebrae column is maintained. The body is seated in a healthy upright position. There is more space for the belly, better arm's length, improved respiration, and more room for the internal organs.

REVOLUTIONARY DESIGN

BACKED BY THE LATEST ERGONOMIC TECHNOLOGIES

Numerous groundbreaking technologies were combined to create this singular innovation. Every part of Zoom is custom designed to support you. Its self-balancing function allows you to move effortlessly while providing optimum spinal support. Its seat and back are designed with temperature control for maximum comfort. So when it comes to long working hours, you won't even feel the strain.

zoom

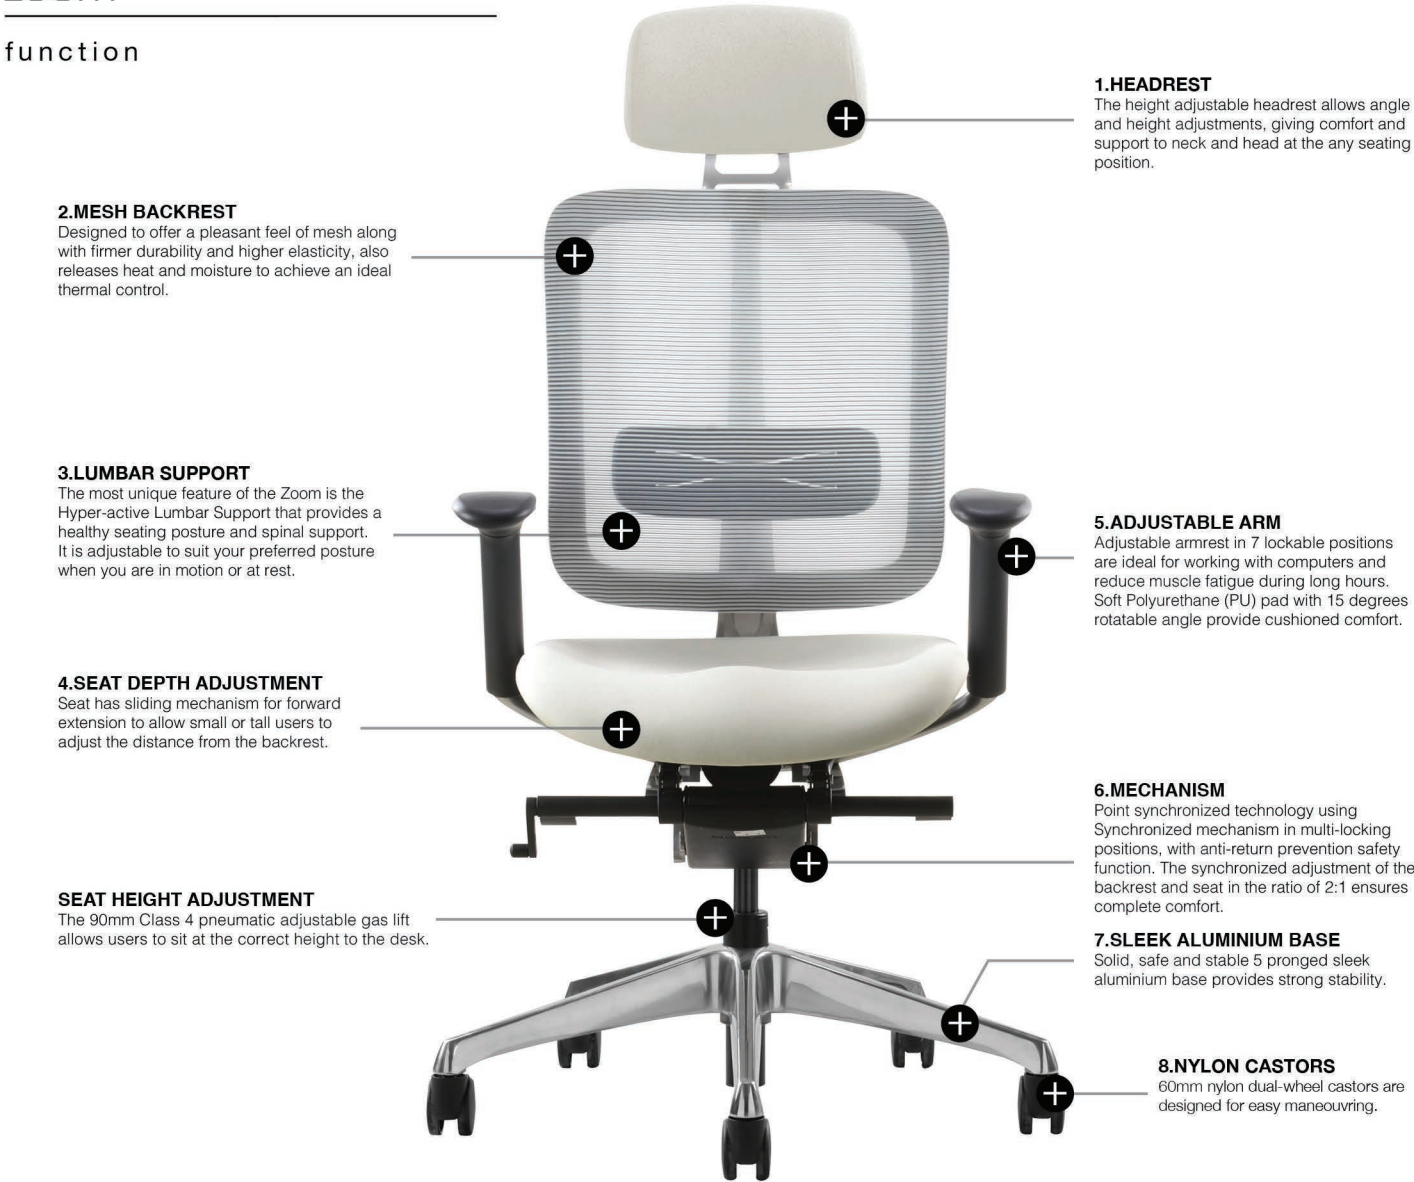

YOU SHAPE ITS DESIGN

Zoom anticipates your every move, every shift, every change of weight. Lean and it follows. Move and it supports. The chair's purpose is to envelope your body. It moves naturally with you and supports you in every possible position. Its only aim is your ultimate comfort.

CUSTOM DESIGNED TO INTERACT WITH YOUR BODY

So when you spend the entire day with Zoom, you spend the day with an intuitive work of art that is designed to anticipate and interact with your every need.
